PRICE 5 CENTS

MARYLAND SEASON AT END

EXPERIMENT WITH PARI-MUTUELS AT PIMLICO TURNS OUT SATISFACTORILY.

Scene of Eastern Racing to Shift to Norfolk Today—Buskin Wins the Bowie Handicap, Two Miles.

Baltimore, Md., November 12.—The 1913 season of racing in Maryland was brought to an auspicious close at Pimlico this afternoon and tomorrow the scene of racing will shift to Norfolk, where the Jamestown Jockey Club will inaugurate a fifteen-days meeting that will lead right up to the opening of winter racing in the south at Charleston December 1.

The Maryland Jockey Club's meeting which closed today, has been quite as successful as in the days when bookmaking was the vogue at the old hill-top course. This year the Maryland Jockey Club introduced the pari-mutuels in accordance with the mandate of the Baltimore County Racing Commission and the experiment has been attended by success. When the pari-mutuel machines were first installed, the system was strange to the local patrons of the sport and naturally not as popular as the older and better known form of betting. Now the public has become thoroughly educated in the new system and it has many champions as a result of the manner in which it has been conducted at Pimlico.

After all at Pimlico the wagering on races is only an incident. It ever has been a race meeting where there has been a great deal of the spirit of sport for sport's sake. This spirit brings together good horses and it brings together good sportsmen. The prize offered or the betting chance is a minor consideration. There is a pride in the horse and his deeds that is outweighed by any other gain that may come from victory. This spirit is shown at every meeting. Sections are loyal to their own horses and the club has fostered that spirit by so framing its programs that sporting races are invited.

In a heart-breaking finish, John Whalen's three-year-old Buskin won the fifth running of the Bowie Handicap, two miles, this afternoon. Buskin beat Barnegat by a short head, with Star Gaze third, several lengths back. It was not a race that added lustre to the Bowie. The time, 3:29.4, was several seconds slower than that for the first Bowie, which marked a new record for two miles. In that event, won by Fitz Herbert, with Superstition second, the first mile was covered in 1:40.4. Today Ringling, the pacemaker for the first mile, ran that distance in 1:45. But this was not surprising when one analyzes the field. There were no Fitz Herberts nor Superstitions in it. Pandorina, winner of the Kentucky Endurance Stakes, was one of the starters.

Races at this distance are popular at Pimlico, as well as in other sections. Ringling showed the way for a mile and three-quarters. Buskin was always in a good position and at the end of a mile and a half he moved up with Barnegat and on the stretch turn these two had narrowed the margin that separated them from Ringling. Once straightened out, Buskin and Barnegat drew away from the others and it was a desperate drive to the end, with Buskin getting the decision by a head.

One of the biggest scratches from the meeting was on hand to say farewell to racing in the east. There were two steeplechases on the card of the consolation variety. One went to a long shot, Orderly Nat, and the other to Madeline L., owned by H. D. Brown, Jr., son of "Curley" Brown.

Royal Mearns scratched from the fifth race today because she bowed a tendon in her work.

W. T. Anderson will ship the horses in the Enright stable to Gravesend, where they will go into winter quarters. Mr. Anderson himself will go to Lexington, where he will take up four yearlings to add to his string.

Robert Walden tonight shipped the two-year-old Canto and five of the horses of Joseph E. Davis to his farm at Middleburgh, Md., where they will go into winter quarters. The Davis lot included the jumpers O Bear and Aurifer. Next season Mr. Walden will come to the races with twenty-two horses. He has re-engaged jockey Alex for 1914. The Chilton yearling that is looked upon as the best of the young horses in the Walden string has been bought by several horsemen and an offer of \$5,000 made by George W. Langdon has been refused.

KENTUCKY STABLES ARE SCATTERING.

Special Train Departs for Juarez with Two Hundred—Charleston Shipment Next.

Cincinnati, O., November 12.—The two special trains carrying owners, jockeys and horses bound for Juarez left Latonia yesterday afternoon and stopped at Louisville to pick up a carload of A. B. Speckels' horses. The trains were made up of two sleepers, one day coach, a diner, a car for automobiles, two baggage cars and thirteen horse cars. The owners represented in the shipment included W. F. Fizer, E. J. O'Connell, F. D. Weir, W. C. Clancy, J. C. Ferris, Seymour Veiller, John Lowe, Earl Linnell, Herbert McDaniel, P. M. Miles, E. L. Fitzgerald, A. Kirby, Doerhoefer & West, Howard Oots, M. R. Farmer, A. G. Dunlap and F. M. Hopper.

Mild weather conditions that prevailed today afforded opportunity to the numerous trainers at Latonia to give their charges much needed exercise. The track, while muddy from footing, was in good condition. The major portion going by special train next Monday noon. A revised list of those owners intending to send consignments on the Charleston special is as follows: Weber & Ward, E. W. Moore, L. Weiss, J. H. McCarren, T. Abadie, G. W. Johnson, J. C. Cain, L. Marion, L. Tauber, W. J. Speirs, W. A. Kirwan, F. J. Pons, West & Cambion, C. S. Wilson, R. H. Clark, Lee Christy, G. M. Johnson, W. Gerst, C. Bills, H. McCoudsky, P. H. Jones, R. E. Campbell and A. Luzader.

W. G. Yanke's string of sixteen horses were transferred to Palmetto Park last Monday, while departures for the same point yesterday from here included the horses of Grefer & Bender, M. A. Colton and J. W. Foreman. These consignments were shipped by express. The big band owned by Adair & Baker will be sent by express tomorrow.

The Monday shipment will probably require sixteen horse cars. There will be two sleepers, two day coaches, two baggage cars and a diner attached to the train for the accommodation of owners, trainers, jockeys and stable employees.

James S. Everman, who had intended going to Charleston, has reconsidered and will winter his horses at the Latonia track. Those he handled for J. W. Johnson will in future be trained by the owner himself. Others who intend to winter at the Milldale course include J. H. Weaver and James Lally.

John Hachmeister departed this morning for Louisville to attend to some business which will likely keep him there until Friday.

Eugene Elrod departed last night for Chicago, where he will spend a few days before proceeding to Juarez.

REVIEW OF INTER-MOUNTAIN CIRCUIT RACING OF 1913

Although racing was inaugurated at two new points in Montana this season, the addition of these tracks failed to compensate for the abandonment of the meetings held in previous years at Lagoon, near Salt Lake City, Utah, and Denver, Colo. The net result was that the total of the distribution by the tracks comprising what is known as the Inter-Mountain circuit amounted to \$243,360, as compared with \$307,705 in 1912. In the event that there is no racing at Coeur d'Alene next season, as a consequence of the passage of anti-betting legislation in Idaho, which became effective at the close of last summer's Coeur d'Alene meeting, it will naturally follow that next year's racing in that section will be marked by a further falling off. This year's total, however, remains comfortably greater than that of two years ago, when \$203,345 was distributed on the circuit. It is intimated that the coming year will bring a re-arrangement of dates in Montana and further expansion in that state. According to report, the various meetings making up the circuit were well patronized. The following tabulation shows in a general way some of the phases of the season's results:

Track and Meeting.	Number Days.....	Number Races.....	Number Wins.....	Number Owners.....	Number Wins & Owners.....	Number Wins & Owners.....	Total Distribution.....	Winnings First Choices.....	Winnings Second Choices.....	Winnings Third Choices.....	Winnings Fourth Choices.....	Winnings Fifth Choices.....	Winnings Sixth Choices.....	Winnings Seventh Choices.....	Winnings Eighth Choices.....	Winnings Ninth Choices.....	Winnings Tenth Choices.....	Winnings Eleventh Choices.....	Winnings Twelfth Choices.....	Winnings Thirteenth Choices.....	Winnings Fourteenth Choices.....	Winnings Fifteenth Choices.....	Winnings Sixteenth Choices.....	Winnings Seventeenth Choices.....	Winnings Eighteenth Choices.....	Winnings Nineteenth Choices.....	Winnings Twentieth Choices.....
Coeur d'Alene	61	374	177	312	110,000	133	95	146	39	34	36	36	36	36	36	36	36	36	36	36	36	36	36	36	36	36	36
Butte	30	180	126	202	58,800	73	34	72	10	9	41	41	41	41	41	41	41	41	41	41	41	41	41	41	41	41	
Anaconda	14	98	98	151	25,350	32	27	39	9	4	33	33	33	33	33	33	33	33	33	33	33	33	33	33	33	33	
Helena	6	38	45	69	11,710	16	11	11	4	0	42	42	42	42	42	42	42	42	42	42	42	42	42	42	42	42	
Deer Lodge	14	84	85	86	17,500	39	24	21	17	15	43	43	43	43	43	43	43	43	43	43	43	43	43	43	43	43	
Great Falls	13	78	49	91	20,000	37	18	23	19	14	47	47	47	47	47	47	47	47	47	47	47	47	47	47	47	47	
Totals and Grand Percentage	138	852	\$243,360	331	209	312	98	76	39	39	39	39	39	39	39	39	39	39	39	39	39	39	39	39	

The Coeur d'Alene Fair and Racing Association was again the leader in the item of total distribution, with the Butte Jockey Club second. The following tabulation shows the distribution of the various organizations since 1909:

Organizations.	1909.	1910.	1911.	1912.	1913.
Coeur d'Alene Fair and Racing Association	\$26,000	\$45,800	\$72,690	\$113,380	\$110,000
Butte Jockey Club	11,850	19,300	19,650	23,050	25,350
Deer Lodge County Racing and Fair Association	10,220	10,975	11,710
Montana State Fair	17,500
Powell County Racing and Fair Association	20,000
Northern Montana Racing Association
Totals	\$68,220	\$65,130	\$145,560	\$204,980	\$243,360

The Butte Jockey Club led in average daily distribution, with the Montana State Fair at Helena a close second. This phase of the statistics since 1909 is covered in the subjoined tabulation:

Track.	Racing Days 1913.	Races 1913.	Daily Av. 1909.	Daily Av. 1910.	Daily Av. 1911.	Daily Av. 1912.	Daily Av. 1913.
Coeur d'Alene	61	374	\$1,879.00	\$1,527.96	\$2,019.17	\$2,061.45	\$1,803.28

STALLIONS FOR ELMENDORF

J. B. HAGGIN SHOWS HIS INTENTION OF CONTINUING BREEDING OF THOROUGHBREDS.

Buy Ballot Privately from John E. Madden and Purchases Sain at Auction—Kentucky Sale Is Concluded with Good Results.

Lexington, Ky., November 12.—James B. Haggin today bought two thoroughbred stallions for his Elmendorf Farm, where he has about seventy good mares remaining of the stud that was at one time the most extensive in this country. From John E. Madden he purchased privately the nine-year-old chestnut horse, Ballot, by Voter—Certo, by Lowland Chief, and this remarkably good race horse, which Mr. Madden bought last winter from James B. Keene, was transferred at about noon today from Hamburg Place to Elmendorf. The negotiations were conducted by Charles H. Berryman, for Mr. Haggin. The price was not made known, but it has been variously reported to have been from \$35,000 to \$50,000. The other stallion is Sain. This nineteen-year-old son of St. Serf and the Task was bought out of Barney Schreiber's consignment to the Kentucky Sales Company's auction this morning by Thomas C. McDowell, acting for Mr. Haggin, for \$5,000. Col. Milton Young and John D. Carr were the contending bidders. Sain, notwithstanding his age, is generally considered a bargain at \$5,000. Jack Atkin was not sold. Mr. Schreiber having placed a reserve of \$12,000 on him and there was no advance over this sum. Neither was Plaudit sold. John E. Madden having placed a reserve of \$10,000 on him. It is said that Johnson N. Camden is negotiating for Plaudit.

The Kentucky Sales Company concluded its auction today with the disposal of 95 head for \$27,510, an average of a fraction less than \$300. The summary:

Stallion.	By.	Age.	Price.
Jack Atkin, b. h. 9, by Sain—El Salado;	\$12,000
Sain, blk. h. 19, by St. Serf—The Task; J. B. Haggin	5,000
Weanling chestnut colt, by Star Shoot—El Salado; P. T. Chinn	3,350
St. Endora, b. h. 15, by St. Simon—Dora; then, Thomas Hitchcock, Jr.	1,000
Sand Dune, ch. m. 5, by Rock Sand—Octoroon; G. D. Wilson	1,000
Weanling bay colt by Jack Atkin—Miss Marlon; O. H. Chenault	850
Weanling brown colt by Sain—Jenny; C. H. Chenault	800
Divonne, blk. m. 15, by Hanover—Zorling; E. R. Bradley	775
Clara Atkin, b. f. 4, by Sain—El Salado; A. B. Hancock	750
Evelyn Doris, b. m. 5, by Ben Brush—Witch Hazel; George Wilker	7

GREAT ENGLISH STUD TO BE REDUCED.

One of the greatest and most profitable breeding studs of England is to be cut down, and of this "The Special Commissioner" says in London Sportsman: "Sir John Robinson has decided to materially reduce the Workshop Manor Stud, as he feels the anxiety of such a large concern is almost too much for him, but his wish is to sell privately and I know there are many people who prefer to buy privately and not to have the prices given publicly recorded. Sir John Robinson has no fewer than forty-four mares and he would, I believe, reduce them by one-half if it can be done on reasonable terms. Any that he may sell he is prepared to warrant in foal and it is needless to say that they have been mated with first-class sires. He would also part with eight or nine foals of this year. His proposal should appeal to buyers, as it is a novelty to warrant mares in foal, and it gets over a great difficulty which foreign buyers often feel when trying to avoid mistakes on such a question. For this reason I have very great pleasure in making known what Sir John Robinson is prepared to offer them if they will go to Workshop with a view to business."

CORRECTION OF ODDS.

The mutual show pay off on Towton Field in race 12483 at Pinlick November 11, was \$2.70.

BELIEVES IN HORSE'S REASONING POWER.

C. E. Brossman, who trained Imp when that great mare was a reigning sensation on the American turf years ago, is a firm believer in the ability of the horse to reason. Mr. Brossman, who is well known to Chicago patrons of racing, recently contributed the following article to the press on the subject.

"That horses have the power to think and reason is a question that in my opinion admits of no argument. Some individuals seem to have the faculty of holding conversation with their horses and find out just exactly what the horse needs and wants; others do not. It seems to be an attribute of the heart, born in."

"Therefore, we can say that true horsemen, like facts, are born, not made. Of course, education and experience will teach a man many valuable and necessary things, but above all, and beyond all, to be a thorough and successful horseman he must have the love of the horse in his heart. When we see a man that a strange dog will come up to on the street and wag his tail, or a lost baby that will rush up to with outstretched arms and a smile on its lips as if it had met the very person it was looking for, such a man is one with whom a horse will talk and do much more with experience would make a good race horse trainer."

"When I first took the great mare Imp to train she was as nervous, flighty and bashful as a sixteen-year-old country girl on her first visit to the city. The first race track I raced her on was Newport. The stalls that had been assigned to me were right up against the seven-eighths pole. For the first few days she would only eat a bite, and then rush to the door and look out. I always had the door kept open so that she could see what was going on. She would walk the stall, tremble and sweat, and it seemed that she lost one hundred pounds in two or three days."

"We would go into her stall, pat her head and talk to her and argue with her, tell her she would not be hurt nor abused and she finally became convinced and reconciled and would eat up everything we gave her and watch the races in the afternoon with as much interest and apparently as much pleasure as any woman in the grandstand. She had reasoned it out that we were all her best friends and would take good care of her. After that she was unafraid."

"Another case that I recall is that of Little Minch. He was by Glenelg, dam Goldstone, owned by George Hankins, of Chicago. He was one of the best race horses in the country and had won on all of the prominent tracks in the United States. Mr. Hankins had just fitted up the Garfield Park track at great expense and it was really one of the most popular and admirably managed race tracks in this country. He selected men of unquestioned honor and integrity as his officials. Colonel Lewis Clark, then in his prime, was presiding judge, and Joseph Swigert secretary. Everything was run on the level—as nearly so as it was possible in the part of human endeavor to make it. Nobody had any advantage, and everybody, horsemen, patrons and officials, were all prosperous and satisfied. Indeed, even now we often hear some old horseman say 'I wish we were back again to the good old Garfield Park days.'"

Now, Little Minch, in his journeying over the country, had reasoned out that if he could steal two or three lengths from his competitors in a race and get the advantage of that much at the start, no other horse could catch him and he would win easily. If he could not get this advantage he would absolutely refuse to start, would stand stock still and let the others run."

Hankins was, of course, anxious to see his horse run on his own track, so he had Little Minch taken to Garfield Park and entered in the races. He won one or two races, always getting off in front and winning easily. The next time he started he commenced his usual tactics, making a position like a general on a field of battle. Manifestly it would be unfair to the other horses to allow Little Minch to continue to get off in front, a position he seemed to appropriate to himself by the right of discovery. So the starter called to one of his assistants:

"Take care of that horse back there, keep him back, which in consequence was done. Down went the flag, away they went—all but Little Minch. There he stood like a statue bolted to the ground. The next day this notice appeared on the bulletin board: 'Little Minch's entry will not be received for any race on this track by order of Col. Lewis Clark.' And he never raced again. Here was a horse absolutely sound, capable, an efficient race horse and a money maker, sent into retirement simply because he knew too much."

"I once had a neighbor at Lithopolis, Ohio, that had a horse by the name of Van, son of Virgil and La Henderson, by Lexington. This horse was a beauty, a bright chestnut, four white feet, a white stripe in his face and he could do almost everything but talk—commanding looking and intelligent as his breeding would indicate. His name was Van. There was a paddock full of a couple of acres with an open box stall in one corner, with manger and feed box nailed in. The crib, where the grain was kept, was some little distance from the stall. This man always kept a pan near a gate that divided the dooryard from the paddock and always carried the horse's feed in the pan. As the horse came to recognize it as his own, he have often been out in the paddock with this neighbor, in different parts of it, at different times and he would say to the horse: 'Van, if you want some oats, go and get your pan.' Away the horse would go, get the pan in his teeth, march up to the crib and wait until he was called up. Then after receiving a measure of oats in his pan, he would carefully walk to his stall so as not to spill any, turn the oats out into his feed box and commence to eat. No one could ever make me believe that that horse did not think."

"The following news item recently appeared in the daily papers: In Dayton during the terrible days of the flood, another story of animal life was enacted. Four horses in one group were washed from their stables by the high waters, and being caught in a net of debris, would all have been drowned had it not been for the intelligence and bravery of one of the animals. Getting behind the three horses, the equine hero pushed all of them through the waters and out to safety."

"That there is some method of communication between the lower animals there can be no doubt. Who has not seen a little chick, when he is in a place of concealment when the old mother hen gives her cry of alarm at the sight of a hawk, or failed to notice the immovable silent posture of a little calf, hid away in some secluded spot in the brush, when its mother notifies it by a peculiar moo that some one is hunting for him? Chickens, cats, dogs, and apparently contentedly yards away? Why then should not the horse be endowed with the same inherent qualities, only in a higher degree, for he surely is the noblest of all animal creation, man's most valuable, bravest and best servant, dauntless in danger, enduring in extremity and uncomplaining in distress."

TRACERY AND PRINCE PALATINE.

I suppose there will be partisans of Tracery and of Prince Palatine to the end of time, though the question is one of merely academic interest, except to the peculiarly constituted people who cannot imagine that more than one horse is a first-class one. What does it matter, for instance, whether St. Simon was better than Ormonde or Ormonde than St. Simon? Partisans, however, are as a rule unable to grasp the fact that the fact that both Tracery and Prince Palatine were good horses indeed, and when I give Tracery the preference it is not because I like Prince Palatine less, but because I like Tracery more both on his looks and on his racing record, not to mention his breeding."

The main difference between the racing careers of Prince Palatine and Tracery is that the former interspersed his great performances with several very bad ones, while the latter never once ran a bad race. He made his debut in the Derby when only half ready and even so finished third. From that time to the Ascot Cup of this year he was unbeaten. As to the Ascot Cup, it is, I believe, the opinion of every jockey who rode in the race, except Saxby, who naturally fancied his own mount, Prince Palatine, that Tracery had to all intents and purposes won when he was knocked out. Apart from any question of its being a false-run race, Tracery's failure to win the Jockey Club Stakes was certainly a glorious one, and then came his final victory over Long Set, which he defeated pointlessly. I prefer him to Prince Palatine on the ground of looks, for there is more scope and grandeur about him, and if it be said he is a trifle short in his back ribs it is, nevertheless, true that his width and power of loin amply compensate for that. You have to look over him, however, from a close standpoint, to realize fully what I mean. To my eye he has more of a blood-like class and character than Prince Palatine, but that is only a matter of individual judgment; the performances are on record. Then as to breeding, here again I slightly prefer Tracery, for we badly want a first-class stallion of No. 19 family, and Tracery supplies that want through such an unimpeachable channel as his granddam, Plaisanterie, which herself took in a second No. 19 line through Monarque, and, of course, there are two other No. 19 crosses in Tracery, through Vedette in St. Simon and Angella. This combination of No. 19 blood with No. 4, as represented by the sire of Tracery, has been scoring success after success on the continent and has been hitherto unattainable in England. It may be at once admitted that Persimmon, the sire of Prince Palatine, was a greater race horse than Rock Sand, but there was a soft taint which came out in many of his stock, whereas the Rock Sands are beyond reproach in this respect. Moreover, Rock Sand has sired in Tracery a better horse by a good deal than himself, but no one will claim for a mo-

ment that Prince Palatine is better than Persimmon. Glare is a splendid tap-root, beyond all question, but for the making of a stallion I think Plaisanterie is a better, and this I say though I am personally interested in Prince Palatine's uncle, Cornstalk, son of Glare, which was bred by the late Sir Daniel Cooper with a view to putting stamina into the family at the first remove, and that this was done with success Sam Darling, who trained Cornstalk, well knows."

However, as in racing merit, so in breeding, there is ample room to differ about Tracery and Prince Palatine without in the slightest degree depreciating either. Both are great race horses and both are beautifully bred. So let it rest and good luck to both of them!—The Special Commissioner in London Sportsman."

PROPER EXERCISING OF STALLIONS.

In the successful manipulation of a stud farm one of the most important elements of success is proper exercise of the stallions. In a state of nature and, indeed, in captivity up to his retirement from the race track, no animal takes so much voluntary or forced exercise as the horse. Yet, in too many instances, directly he is relegated to stud work he undergoes an entire change of life habits. Many a second-class once successful race horse have I seen doomed to pass the remainder of their days either craning their necks in a vain endeavor to look out of an eight feet high window or sadly wearing away their existence before the narrow bars which give them a fleeting glimpse of green pastures such as they often scamper over in the unrestrained of youthful spirits; and at most, in the way of exercise, a monotonous promenade round a yard thirty feet in diameter, with solid boarded walls ten feet high, and not even a peep at the world around them. Is it a wonder that they get maddened by the outside clatter of hoofs, clonnet's appealing to them of the more fortunate freedom of their fellows, and finally end by savaging their grooms?"

How one's sympathy does go out to the stalled stallion, or the chained hound howling at his kennel door. Sad sights both! and quite uncalculated for, if owners were less blind to their own true interests, or gifted with more humanity. As a general rule it will be found that, if the usual walking exercise of the race horse is not interrupted (because of the transfer from post to paddock) the health and temper of the animal is not suffered. So dearly do stallions value their daily exercise, that I have known them, when deprived of it by continued wet weather or other causes, take to pawing and kicking at the walls of their loose boxes, until taken out as usual. One of the gentlest tempered stallions I know, a seven-year-old (trained by J. W. G. Brown, A. M. to America in 1893, never fails to break mildly rapping at the side of his box after a few days' neglect. It is hard to conceive any treatment more pernicious than to so suddenly change the habits of the most active of all domestic animals. And it is bound to bring about, in the case of stallions, mental and temper, and increased liability to catch colds, or to suffer from constipation and a score of other ills, which tend to reduce the value of the animal, and often bring about his early death, and certainly render him comparatively useless in the desired, uncalculated for, if owners were less blind to their own true interests, or gifted with more humanity. As a general rule it will be found that, if the usual walking exercise of the race horse is not interrupted (because of the transfer from post to paddock) the health and temper of the animal is not suffered. M. to America in 1893, never fails to break mildly rapping at the side of his box after a few days' neglect. It is hard to conceive any treatment more pernicious than to so suddenly change the habits of the most active of all domestic animals. And it is bound to bring about, in the case of stallions, mental and temper, and increased liability to catch colds, or to suffer from constipation and a score of other ills, which tend to reduce the value of the animal, and often bring about his early death, and certainly render him comparatively useless in the desired, uncalculated for, if owners were less blind to their own true interests, or gifted with more humanity. As a general rule it will be found that, if the usual walking exercise of the race horse is not interrupted (because of the transfer from post to paddock) the health and temper of the animal is not suffered. So dearly do stallions value their daily exercise, that I have known them, when deprived of it by continued wet weather or other causes, take to pawing and kicking at the walls of their loose boxes, until taken out as usual. One of the gentlest tempered stallions I know, a seven-year-old (trained by J. W. G. Brown, A. M. to America in 1893, never fails to break mildly rapping at the side of his box after a few days' neglect. It is hard to conceive any treatment more pernicious than to so suddenly change the habits of the most active of all domestic animals. And it is bound to bring about, in the case of stallions, mental and temper, and increased liability to catch colds, or to suffer from constipation and a score of other ills, which tend to reduce the value of the animal, and often bring about his early death, and certainly render him comparatively useless in the desired, uncalculated for, if owners were less blind to their own true interests, or gifted with more humanity.
